## Open Call: 3D Film Night Lancaster, United Kingdom

As part of the forthcoming f.city digital arts festival, folly is looking for a selection of international artist's short films that have either been produced using 3D modelling software such as [www.blender.org](http://www.blender.org) OR are best viewed using 3D glasses with anaglyph (red/cyan) or polarising filters.

Films can be up to 30 mins in length, and must be submitted on DVD or digitally via ftp or a weblink by 4pm GMT on the 24th of August 2006. Submission forms can be obtained from [jennifer.stoddart@folly.co.uk](mailto:jennifer.stoddart@folly.co.uk)

The final selection of short films will be shown at a special free film night to complement 'Perimeters, Boundaries & Borders', a major new group exhibition of contemporary art and design practice that explores the use of digital technologies and the convergence of practice between architecture, sculpture and product design.

For further information about folly and f.city please visit our website at [www.folly.co.uk](http://www.folly.co.uk) or contact [mark.daniels@folly.co.uk](mailto:mark.daniels@folly.co.uk) if you require any more information about the 3D film night.

**Please send your 3D shorts to:**
